

CLAIMS

What is claimed to be new and desired to be protected by Letters Patent is set forth in the appended claims.

I claim:

1. A Method in stimulating the process of Aquilaria resin formation by making wounds on the Aquilaria's trunk consisting of:
 - a) Selecting Aquilaria aged between 5-9 years old with 35-55 centimeters in diameter of the trunk
 - b) Making of wounds on Aquilaria's trunk.
 - c) Collecting Aquilaria resin
2. The method of Claim 1, wherein the wounds on Aquilaria's trunk are done in square shape by taking out the outer layer and tissue with the suitable width, length, depth which depend on the size of trunk and the wounds do not affect the growth with holes made in the square that lead to the heartwood.

3. The method as recited in Claim 2, wherein the wounds can be the points that lead the stimulant to *Aquilaria* to stimulate the resin formation.

4. The method of Claim 1, wherein collecting resin is performed at the part of the trunk or the root that is stimulated to produce resin.
